## BIOGRAPHY

---

Jim A.C. Everett is a Reader (Associate Professor) at the University of Kent, specializing in moral judgment, perceptions of moral character, and the moral psychology of artificial intelligence. Jim completed his BA, MSc, and D.Phil at the University of Oxford, before receiving a Fulbright Fellowship to work at Harvard University, and a Marie-Sklodowska-Curie PostDoctoral Fellowship to work at Leiden University.

Jim's work is deeply interdisciplinary, and alongside traditional social psychological approaches he draws from philosophy, evolutionary theory, and behavioural economics. In his work, he investigates topics such as how, when, and why we trust artificial agents in the moral domain; how we incorporate (im)partiality into our moral judgments; how we infer character from moral judgments and why this is important; how we think about the moral worth of animals; how our moral beliefs influence our understanding of free will and determinism; how morality is central to perceptions of personal and social identity; and how group processes shape moral judgment and vice versa.

Jim has published his work in leading journals such as *Psychological Review*, *Nature Human Behaviour*, the *Journal of Personality and Social Psychology*, the *Journal of Experimental Psychology: General*, and *Bioethics*. His research has been featured in *The Times*, *The Guardian*, *The Daily Mail*, *The New York Times*, *Scientific American*, and more.

Jim has received early career awards from the three largest international societies in social psychology: the 2020 Early Career Award from the European Association of Social Psychology, the 2021 "Rising Star" Award from the Association for Psychological Science; and the 2021 Early Career Trajectory Award from the Society for Personality and Social Psychology. In addition, Jim's joint-first-authored paper in *Psychological Review* received the 2019 Wegner Theoretical Innovation Award from the Society for Personality and Social Psychology. Finally, Jim received the University of Kent's Starting Researcher Prize, and has won the Philip Leverhulme Prize in recognition of his internationally recognized early career contributions to psychology.

Jim's current work is funded through a New Investigator Grant from the Economic and Social Research Council (£300,000); a Philip Leverhulme Prize from the Leverhulme Trust (£100,000), and

a Starting Grant from the European Research Council, now fulfilled through the UKRI ESRC (€1,700,000).

## OPEN SCIENCE STATEMENT

---

I am committed both to upholding open science practices in my work and to teaching students in these new best practices to allow them to have the best careers they can while also advancing our collective scientific knowledge. My profile at the Open Science Framework can be seen [here](#).

## DIVERSITY STATEMENT

---

As a first-generation academic, a member of the LGBTQ community, and someone who received disability support during my undergraduate degree, I am acutely aware of the diverse challenges that students can face. I am committed to drawing both on my own experiences and learning from others to best be able to support students, helping them achieve their potential regardless of their different difficulties, experiences, or backgrounds.
